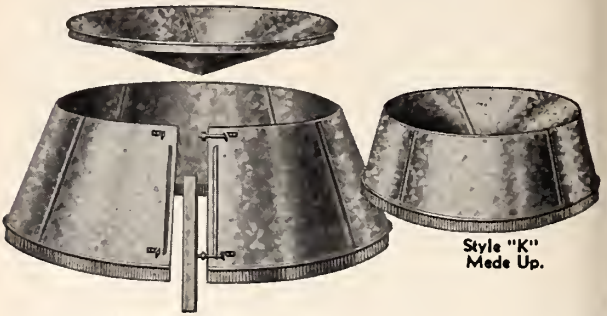
MILCOR Furnace Bonnets



Style "K" Made Up.

Style "K" Knocked Down.

The knocked-down feature permits a low freight rate and saves space while in stock. Assembled in one minute. Greater strength and rigidity than eny other on the market.

Special seams provide unequalled strength. A flange receives the connecting end end holds it rigid and air-tight.

Style "K" Bonnet 13½ inches high. See sizes below.

Style "K" is made up in 16 sizes shown below. Note seam construction not only on sides end top but around top of bonnet body to join top end side sections. (13½ inches high.)

(Other heights furnished to order.)

"H & C" Baseboard Registers No. 130 Series With Removable Face

(Formerly manufactured by Tuttle and Bailey Mfg. Co.)

No. 130 Series, formerly known as Style 902

The No. 130 Series is a popular line with those who prefer a plain lattice register which is installed with the stackhead overlapping the register frame. The stackhead opening is 2⅛" from the floor line.

Prices Each.

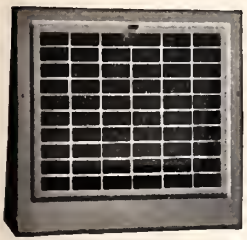
Stack-head Depth Outside	Face Opening	Black Japan	White Japan or Tanbo	Electro Plated	
				Oxidized Copper	Nickel or Brass*
6⅛	8x10 (8)	$2.40	$2.82	$4.20	$4.62
6⅛	8x12 (9)	2.88	3.48	4.74	5.22
6⅛	9x12	3.60	4.20	5.40	5.88
7⅛	8x12	3.60	4.20	5.40	5.88
7⅛	9x12 (10)	3.60	4.20	5.40	5.88
7⅛	10x12	4.80	5.52	6.90	7.62
7⅛	11x13	5.40	6.30	8.10	9.00
9⅛	11x13 (12)	6.30	7.20	9.00	9.90
9⅛	12x14	7.80	9.00	10.20	11.40

*Not carried in stock but can be furnished promptly.

Style 402 — Registers

All Steel—One-Piece—Excess Capacity.

The Face is not removable. In all other features Style 402 (One-Piece) Register is the same as Style 130 (Two-Piece) Register, as described above. Wood screws for attaching come with each register.



Prices Each.

Stack-head Depth Outside	Face Opening	Black Japan	White Japan or Tanbo
6⅛	8x10 (8)	$2.16	$2.54
6⅛	8x12 (9)	2.60	3.14
7⅛	8x12	3.24	3.78
7⅛	9x12 (10)	3.24	3.78
7⅛	10x12	4.32	4.97
9⅛	11x13 (12)	5.68	6.48

All 6⅛ Depths packed—10 In Container.
7⅛ and 9⅛ Depths packed—5 In Container.

Standardization.

For 2nd Floor:—Use 6⅛ Registers (and avoid two stacks).
For 1st Floor:—Use (8) for 8 in. Ro. Pipe..... 50 sq. In.
Use (9) for 9 in. Ro. Pipe 63 sq. in.
Use (10) for 10 in. Ro. Pipe..... 78 sq. in.
Use (12) for 12 in. Ro. Pipe.....113 sq. in.

When ordering Registers, specify Quantity, Style, Opening, Size and Finish.

All quotations are F. O. B. point of shipment. Actual freight, however, will be allowed on orders for 50 or more pieces in one shipment, or $50.00 in value, to points east of the Missouri and north of the Ohio Rivers and Washington D.C. except that to places west of Omaha, Sioux City, Sioux Falls, Minneapolis, and Duluth, freight is allowed only to the crossing point of a line through those cities, and except to points in Washington and Aroostook Counties, Maine, where Bangor freight only is allowed.

Prices subject to change without notice.

H. & C. No. 330 With Removable Face

(Formerly manufactured by Tuttle and Bailey Mfg. Co.)

No. 330, formerly known as Style 302.

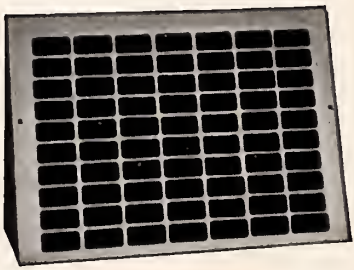
This two-piece sidewall register is made only in horizontal setting. The edges of the stackhead can be turned over the outer frame just as in No. 130 Series Baseboard Register, formerly known as Style 902. The deep flange on the rea of the register face fits snugly into the stackhead.

In ordering, specify Style—Size—Finish.
"As Thin as a Wafer."

Opening Size	Black Japanned	White Japanned and all Tanbo Finishes	Plated Oxidized Copper	Plated Bronze, Brass or Nickel*	Standard Packing in Container
8x10	$1.98	$2.40	$3.78	$4.62	10
8x12	2.28	2.76	4.38	5.28	10
9x12	2.52	3.06	4.80	6.12	10
10x12	2.88	3.48	5.28	6.60	10

*Not carried in stock but can be furnished promptly.

H.&C. No. 608 formerly known as Style N-92



No. 608 is made with projections from the wall varying from 4 to 6¾". Also furnished in nickel, brass and bronze finishes.

In ordering, specify Style—Size—Finish.

Opening Size	Black Japanned	All Tanbo Finishes	Plated Oxidized Copper
4x14	$1.20	$1.68	$2.40
4x30	2.58	3.60	5.52

11x20	6.60	7.80	11.40
13x30	8.40	10.08	13.20

All quotations are F. O. B. point of shipment. Actual freight, however, will be allowed on orders for 50 or more pieces in one shipment, or $50.00 in value, to points east of the Missouri and north of the Ohio Rivers and Washington, D. C., except that to places west of Omaha, Sioux City, Sioux Falls, Minneapolis, and Duluth, freight is allowed only to the crossing point of a line through those cities, and except to points in Washington and Aroostook Counties, Maine, where Bangor freight only is allowed.

"H & C" No. 150 Series Baseboard Registers

See Catalog No. 30, Section H.

This is a two-piece register with face that is removable by a quarter turn of the locking buttons.

While this design register has not quite the free air capacity of the bar-type No. 170 and No. 190, still the oblong hole perforations make it more efficient than other plain lattice design registers. Height from floor to face opening, 2¼ inches.

No. 150, Two-Piece.

Prices Each.

"H&C" No. 160 Series Baseboard Registers

This register follows the general detail construction of No. 150 series, except that it is a one-piece register. The frame and face are made from one piece of wrought steel and the face is not detachable. The fretwork is formed back, affording large free air capacity. The single valve is controlled by an adjustable friction hinge which is positive in operation and thoroughly dependable.

Height from floor to face opening, 2¼ inches.

No. 160, One-Piece.

Prices Each.

MECHANICALLY CORRECT

Petent Pending

KUEHN'S FRICTIONLESS TEE-JOINT

UNIFORM BLUE

The Finest Tee-Joint Ever Made

Frictionless construction permits an equal draft in each pipe. No current of air will flow properly around a right angle corner. This Tee-Joint eliminates right angle corners entirely.

Its advantages are so obvious that it sells itself. The sooner you get your stock of these new Tee-Joints the sooner you can start turning them over at a real profit.

Note the heavy seams, smoke tight joints.

MILCOR
Airtite Wood Heaters

VICTORY

GLORY

MILCOR

TRIUMPH

WINNER

Made of heavy gauge Uniform Color Blue Steel, oiled to prevent rusting. Stands up well from the floor on unbreakable pressed steel legs. Furnished both lined and unlined. Packed one in a carton except No. 160 and No. 180 which are packed two in a carton. The Milcor AIRTITE is rigidly constructed with strong double seam on top and bottom. The 16-in. size is equipped with 3 legs and 5-in. stove pipe collar; all others have 4 legs and 6-in. collars.

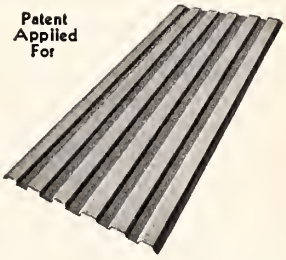
MILCOR A-ONE SIDING

Registered Trade Mark.

Patent Applied For



Here is a distinctive, unique metal siding which is unequaled for beauty of appearance, durability, and protection against fire. Manufactured by Milcor precision methods from Sheet Steel, Toncan Iron and Copper Alloy Steel, Galvanized or Painted. The design of this siding is outstanding because of its high-lights and deep shadows, which make it an effective material in any of a hundred different uses. Note the contrasting effect in the vertical view shown at the top of the page. The above illustration shows Milcor A-One Siding with the ribs in horizontal position. Complete sheet is 27⅛ inches wide and covering width is 24 inches. Each rib is two inches wide and a half-inch deep.

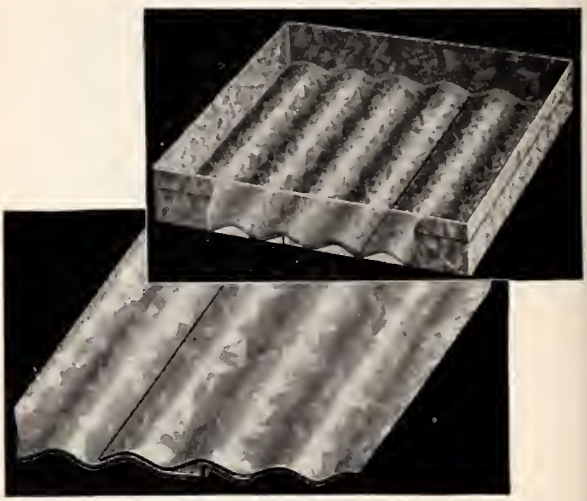
"Kant-Leak"

Non-Syphoning 1¼ inch Corrugated Roofing

This famous roofing has given excellent satisfaction for years. The patented non-syphoning feature, which is clearly illustrated in the accompanying cuts, positively prevents leakage.



The Non-Syphoning feature of Kant-Leak Corrugated Roofing is proven effective by the above Demonstration Box.

We will be pleased to furnish the above Demonstration Box to any dealers who may be interested.

The box is composed of two small sections of Non-Syphoning Roofing, placed together the same as they would be on a roof. The sides of the box are soldered fast to the outside edges of the roofing. The corrugated lap is identically the same as it would be when applied to the roof.

This box can be filled with water, and there will be no syphoning whatever, as our air space will entirely offset the capillary attraction. Any seepage that may occur from a driving rain, or from the corrugations being banked with snow, is carried away by the small gutter which forms the Non-Syphoning feature. The capacity of said gutter is much greater than is necessary to carry all the water that may be driven over or through the corrugation.

You can guarantee this roofing to your customer without any hesitancy whatever. All those who have used it are satisfied customers, and every one a booster.

SPECIFICATIONS

Size of corrugations 1¼ inches.

26 inches wide, covers 24 inches.

Stock lengths 5, 6, 7, 8, 9 and 10 feet.

Special lengths 11 and 12 feet.

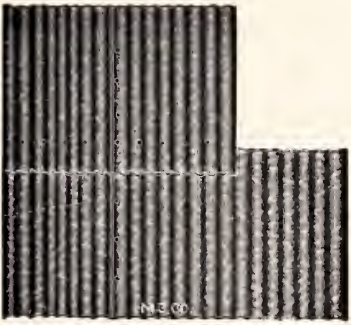
Made of Open Hearth Galvanized Steel in 29, 28 and 26 gauge.

Also of Copper Alloy Bearing Steel and Toncan Iron in 28 and 26 gauge.

Ask for samples and prices.

Corrugated Elevator Siding

1¼" and 2½" Corrugations.



Sheets are laid in such a manner that the elevator sides have a chance to settle without disturbing the fastenings of sheets. Our 1¼, 2 and 2½" Corrugated Sheets are 26 inches wide by 32 inches long, and cover 24 inches. The sheets are laid with a 2-inch end lap and the nails are two inches above the upper edge of lower sheets, thus allowing the sheets to slip 2 inches in every 32 inches as the sides of the elevator settle, and will not buckle or draw the nails.

Prices per Square.

End Wall Flashing for "Twodrain" Channel Roofing

This End Wall Flashing carries the panel design the same as "Twodrain" Ridge Roll. It makes a tight joint where lean-to buildings on which "Twodrain" Roofing is used, are joined to larger buildings.

Made in 26 inch lengths.

Prices per 100 feet.

No. 29 Gauge Milcor Galvanized Steel	$ 9.00
No. 28 Gauge Milcor Galvanized Steel	10.00
No. 26 Gauge Milcor Galvanized Steel	12.00

Gambrel Roof Joint for "Twodrain" Channel Roofing

This "Twodrain" Accessory is used to make a storm-tight joint on Gambrel Roof Hips. Sheets of "Twodrain" roofing lap over the Gambrel Roof Joint above the hip and under the apron of the Gambrel Roof Joint below the hip. This effectively prevents leaks.

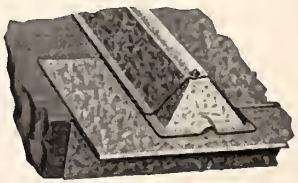
Made in 26 inch lengths.

Prices per 100 feet.

No. 29 Gauge Milcor Galvanized Steel	$ 9.00
No. 28 Gauge Milcor Galvanized Steel	10.00
No. 26 Gauge Milcor Galvanized Steel	12.00

Channel End Cap for "Twodrain" Channel Roofing

End Cap
Patent No. 1,855,357



End Cap Applied

These End Caps are designed to close the ends of the "Twodrain" Channels at the eaves edge of a roof or at the break in a Gambrel Roof. Water coming down the channels of the "Twodrain" Roofing flows off through a small opening left in the base of the cap. These caps are easily and quickly applied by nailing through the "Twodrain" Channel Ridge as shown above.

Prices—20c per 100—F. O. B. Cars, Canton Ohio.

Ask for prices on "Twodrain" Channel Roofing made from Copper Alloy Steel, Toncan Iron, or pure Copper.

Special Work

offers another lucrative market for the capable sheet metal contractor. Some of it he can construct in his own shop, but generally we could fabricate it more economically for him, especially if it be large, heavy or intricate.

Our large equipment and extensive experience enable us to give service of exceptionally satisfactory nature.

Submit your special problems to us.

Marquees

which are daily becoming more popular and in greater demand, offer a very profitable field to the energetic dealer who will go out and talk up this type of work. They possess both beauty and utility, and are suitable for every kind of building.

Marquees are generally built to Architects' plans or sketches. We will gladly quote you price on anything of this nature you may desire.

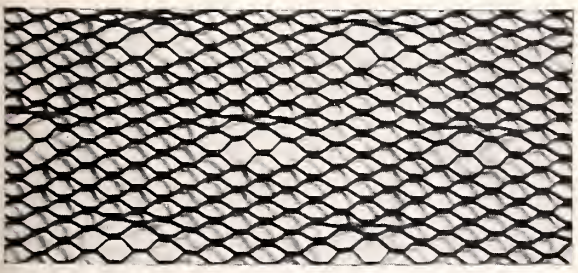
and 340 lb. Galvanized ..... Add 4c net per sq. yd.

All of the above furnished in sheets 24x96 inches, 1-7/9 square yard, each. Packed nine sheets, sixteen square yards to bundle.
We do not break bundles.

MILCOR Furlath A Self-Furring Stucco Base

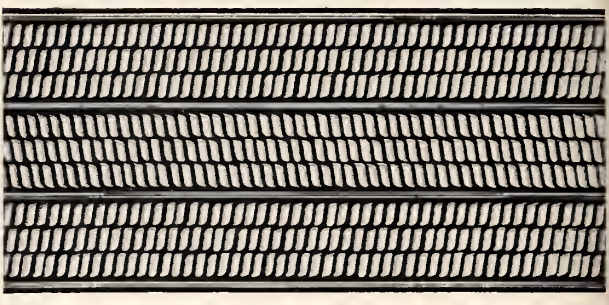


Milcor Furlath is NETMESH or SMALMESH Diamond Expanded Metal Lath deeply indented at regular intervals. These indentations fur the lath away from the sheathing, affording not only a good stucco base, but also a strong reinforcement, since the lath becomes completely embedded in the mortar.

Prices are same as those for regular NETMESH or SMALMESH Lath shown above, plus 1c net per square yard.

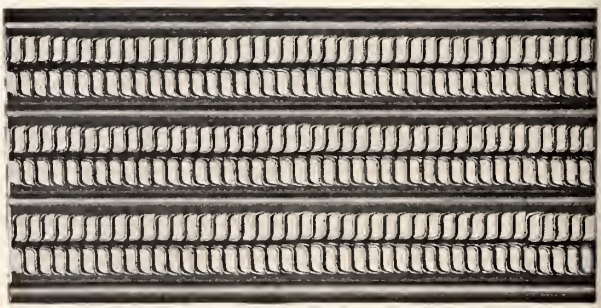
KUEHN'S MESH SPECIAL

Metal Lath



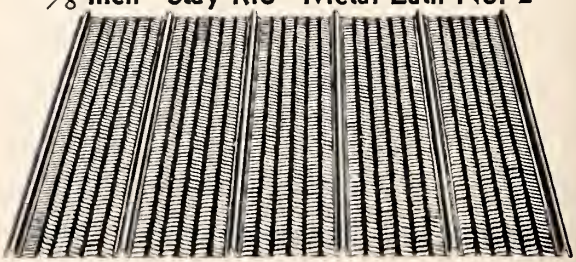
Kuehn's Specialmesh is Milcor's newest metal lath. There are 16 reinforcing ribs to a sheet, each 1½ inches apart. They are corrugated to make them doubly rigid. The mesh is scientifically designed to secure adequate plaster key and assure proper metal surface for effective reinforcement and for economy in the amount of mortar used.

"Stay-Rib" Metal Lath No. 1



Has reinforcing ribs ½ inch wide and 1¾ inches apart, center to center. This gives a rigid, flat, strong lath, permitting extra wide spacing of studs, joists or channels and effecting a big saving in both labor and material.

⅜-Inch "Stay-Rib" Metal Lath No. 2



Milcor Stay-Rib No. 2 Metal Lath has heavy ribs, ⅜ inch high, spaced 4.8 inches from center to center with five stiffening members between each rib as reinforcement for the connecting strands.

Stay-Rib No. 2 is used as a self-furring plaster base for walls and ceilings. The ribs fur the lath ⅜ of an inch out from the studding.

KUEHN'S Specialmesh and STAY-RIB Metal Lath No. 1 (1/8 Inch Rib).

STEELKRAFT

A New Plaster Base by Milcor Superior To All Others

OUTSTANDING FEATURES OF STEELKRAFT

1. Unequalled Plaster Grip.
2. Insulation without impairing efficiency of metal lath. (No holes in paper.)
3. Tough, waterproof paper —can be attached to any Milcor Lath. (See Pages 93 to 96.)
4. Saves Plaster.
5. Automatic back plastering
6. More rigid and easily worked.
7. Steel reinforcing.
8. Sound deadening.
9. Crack prevention.
10. Prevents lath or stud marks.
11. Added structural value.
12. Assures uniform thickness of plaster.

Heavy, waterproof paper will be used as standard for Steelkraft backing. Other types of paper, however, may be obtained for use in special projects.

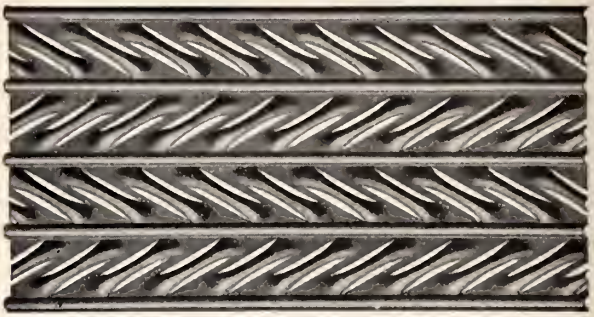
Cost is only 5cents per square yard Net Extra on any Milcor Lath.

STEELKRAFT With Milcor Furlath

Makes an ideal combination. The indentations fur the lath away from the paper and assure complete back plastering.

Send for Complete information, samples and prices.

Ti Lath Metal Lath



Especially recommended for tile and terrazzo backing.

Sheets 24″x96″. Covering width 24 inches; length 96 inches. Packed 9 sheets, 16 sq. yds., per bundle. We do not break bundles.

"Expansion" Corner Bead

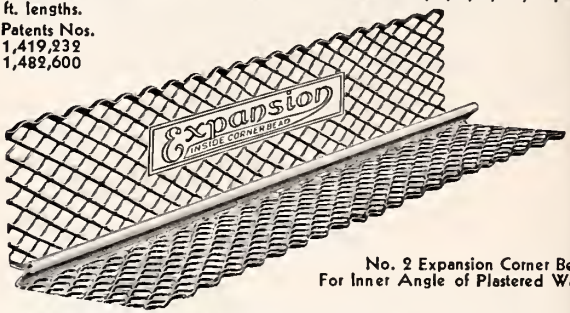
Eliminates the necessity of clips and effects a big saving of time in erecting.

Patents Nos.
1,419,232
1,482,600

No. 1 Expansion Corner Bead
For Outer Angle of Plastered Wall.

The new and exclusive feature of Expansion Corner Beads is the use of Expanded Diamond Mesh reinforcement in the wings or webs instead of practically solid members as heretofore universally used. Made in 6, 7, 8, 9, 10, 11, and 12 ft. lengths.

Patents Nos.
1,419,232
1,482,600



No. 2 Expansion Corner Bead
For Inner Angle of Plastered Wall.

Made of Tight-Coat Galvanized Open Hearth Sheets in 8, 9, 10, and 12 ft. lengths. Crated in approximately 1,000 and 500 ft. lots. Weight per 1,000 ft. crated, 230 pounds.

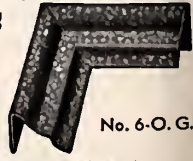
Casing Locking Clip

When used in conjunction with Locking Clip, Casings are punched with 7/16 in. round holes, 3 in. centers. A Clip every 12 inches, however, will be ample. In setting, ¾ in. No. 10 round head screws are driven within, say ⅛ inch of home in the permanent jamb. The casings are then slipped over the screw heads and after lining up are nailed to the buck. Then the Locking Clips are slipped under the screw heads and driven home with any handy tool. This operation locks the Casing immovably down on the jamb, something heretofore impossible with metal trim of this character.

Clips, $7.00 per 1,000.
In All Zones Delivered.
Shipping weight per 1,000, 15 lbs.
No. 2 Casing Clips, 28 lbs. per 1,000 pieces.
$8.00 per 1,000 pieces. All zones, delivered.

One-Piece Mitre for No. 4, ¼ Rd., No. 6 O. G. and No. 9 Special ¼ Rd. Casing

This mitre is designed to slip inside of casing, and is therefore hidden from view. Holds casing in place in event of shrinkage of wood or settlement.



No. 6-O. G.

Price $7.00 per 100 pieces, in all Zones Delivered.
Shipping Weight per 100, 8 lbs.

MILCOR
Metal Bases and Window Stools With Expansion Wings

The advantages of the Milcor Expansion Wing can be obtained on the great Milcor Line of Metal Bases, Window Trim and Stools. This line includes the complete Milcor metal trim, metal bases, window stools, chalk troughs, chair rails, mouldings, etc. It is augmented by the Richsto Line of metal trim, recently acquired and perfected by Milcor.

It is of course taken for granted that sanitary, fire-safe and economical metal bases and window stools have important advantages over the old-fashioned type made of wood.

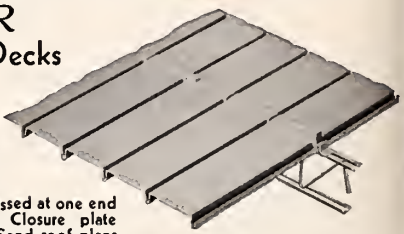
MILCOR Steel Domes

For Maximum Efficiency in Floor Construction

The MILCOR Steel Dome method of constructing long span floors or roofs of reinforced concrete, accomplishes these practical advantages: Saves 50% to 60% of the concrete ordinarily required for solid-slab construction of the same depth. Milcor Steel Domes are designed with sides tapered to such a minimum degree that a saving in concrete of 6% to 12% over other types of domes is effected. Saves time in erection and reduces labor costs as well as eliminating much material expense. Complete detailed information gladly furnished.

MILCOR Steel Roof Decks



Fabricated from heavy gauge copper alloy black open hearth steel painted black — and tight-coat galvanized steel. Ribs 1½" and 1¾" deep, spaced 6" and 9" centers. Ribs depressed at one end to permit easy nesting. Closure plate furnished where desired. Send roof plans to our Engineering Department and we will supply you with all details necessary. Write for descriptive information.

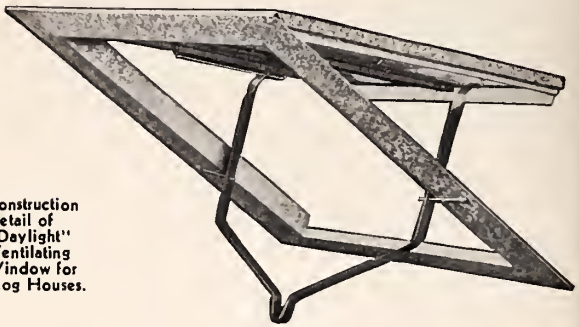
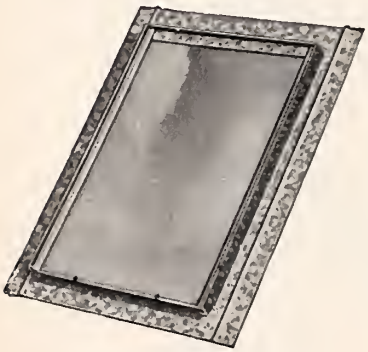
"Daylight" Puttyless Hog House Windows



Construction Detail of "Daylight" Ventilating Window for Hog Houses.



Spaces for Glass 20x28 inches.
Size of Frame 27x33½ inches.

Puttyless "DAYLIGHT" Hog House Windows are made either stationary or with ventilating attachment.

They are easily installed and will not leak. Have 4-inch flashing all around, which lays over shingles at bottom and under at top and sides. Rain or condensation carried off through center and side bars.

"DAYLIGHT" Puttyless Hog House Windows are made of heavy galvanized steel.

Ribbed glass 3/16 in. thick is recommended and can be secured from the Milcor Steel Company.

Glass is not included in prices.

The Ventilating Attachment is very simple and easily operated. By pulling on the handle the window is opened and held open until handle is pulled in opposite direction.

Always specify whether ventilating attachment is desired when ordering.

Full size of frame 27″x33½″. Part containing glass 20″x28″.

Glass Not Furnished. Standard size, furnished by any dealer.

Prices.

MILCOR Super-Extruded Aluminum Skylights

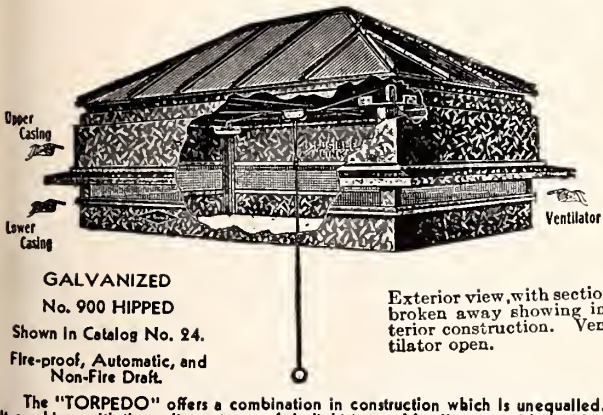
The following ten outstanding features make this skylight the finest, most satisfactory and most desirable skylight on the market today:

1. Aluminum structural advantages.
2. Easy to erect or dismantle.
3. No cross trusses.
4. No condensation trouble.
5. Free from corrosion.
6. Pleasing appearance—no painting.
7. Light in weight.
8. No maintenance.
9. Any size—all types.
10. Complete with fittings.

Write to Milcor Steel Company for complete description, specification data and prices.

Can be furnished in all styles shown on following pages.

"TORPEDO" Ventilating Skylight



GALVANIZED

No. 900 HIPPED

Shown in Catalog No. 24.

Fire-proof, Automatic, and Non-Fire Draft.

Exterior view, with section broken away showing interior construction. Ventilator open.

The "TORPEDO" offers a combination in construction which is unequalled. It combines with the ordinary types of skylight tops a Ventilator provided with a movable shutter for opening, closing or otherwise regulating, to the amount of ventilation desired. The ventilating opening is protected with coarse mesh wire screening, to prevent the entering of sparrows, swallows or other birds.

Wire cables are fastened at the upper four corners of a movable shutter and operate over single pulleys at the corners and over a twin pulley in the middle cross bar. The movable shutter operates between the inner side of upper casing and the outer side of wire screen and is raised to open by pulling the chain and held in place by fastening inside, it is lowered to close by releasing the chain.

All Milcor Skylights are shipped with Ribbed Glass cut to size and boxed separately, unless otherwise specified when ordering.

Wherever Toncan Iron is preferred, write for Prices.

ANY SIZE MADE TO ORDER.

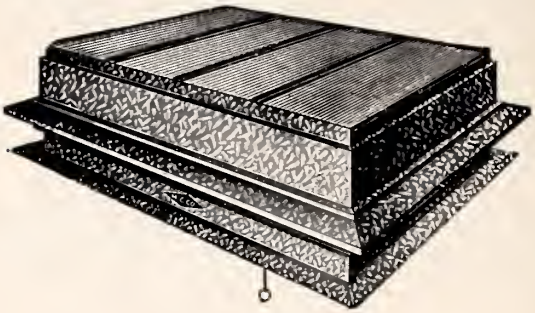
"TORPEDO" Ventilating Skylight

These Skylights are shipped with Ribbed Glass cut to size and boxed separately unless otherwise specified when ordering.

Galvanized. Can be used on any style roof.

Made in three styles of skylight tops—hipped, single and double pitch.

Simple in Construction—Easily Operated.



No. 901 SINGLE PITCH.

Complete description in Catalog No. 24.

Prices Each.

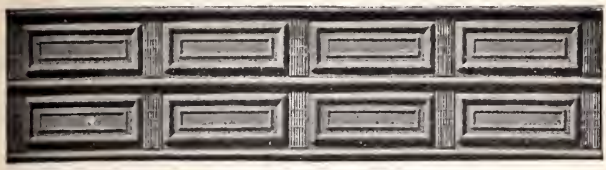
Adjustable Self-Furring Ceiling Plate No. 1200

For Factories, Warerooms, Storerooms, Garages and other places where economy is one of the principal considerations.

The pattern of the individual plate is so designed as to admit of the adjustment of plates, two inches lengthwise, longer or shorter, in erecting, to conform to the variation in space between the joists.



Ceiling Plate No. 1200—Size 24x98 inches.

No. 1200 plate, reckoning its covering capacity at 96 inches, readily adapts itself to joists laid 12, 16 or 24 inches on center.

The large beads running full length of the plate between each row of panels give it rigidity and strength, and obviate the necessity of furring strips. The plates are nailed along each side, and the ease and simplicity of erecting will be quickly appreciated.

Price, per square, primed one coat.....$7.40

Continuous Ceiling Plate No. 1201
